

Compass by Selective users receive exclusive savings on additional Radius products

Drive efficiency, improve performance and boost safety and security

Our vehicle camera system combines our Vision dash cam range with our Kinesis software, offering complete visibility of your fleet. Access our Kinesis platform online or via our mobile app to stay informed wherever you are.

Road Facing or Road + Driver Facing Dash Cameras

Our vision dash cameras capture footage of the road ahead, with an additional in-cab option also available. Set alerts, view Live Feed, and download video clips for Driver Coaching. Paired with the insights gained by your Compass by Selective Vehicle Tracker, this combination delivers a powerful and comprehensive safety solution.

Crystal clear HD video: Capture high-quality footage, day or night, providing a real-world view around incidents and near misses, as well as a realtime view with Live Streaming capabilities.

Complete visibility: Observe the road ahead and what's happening within the vehicle with our dual-facing dash cams.

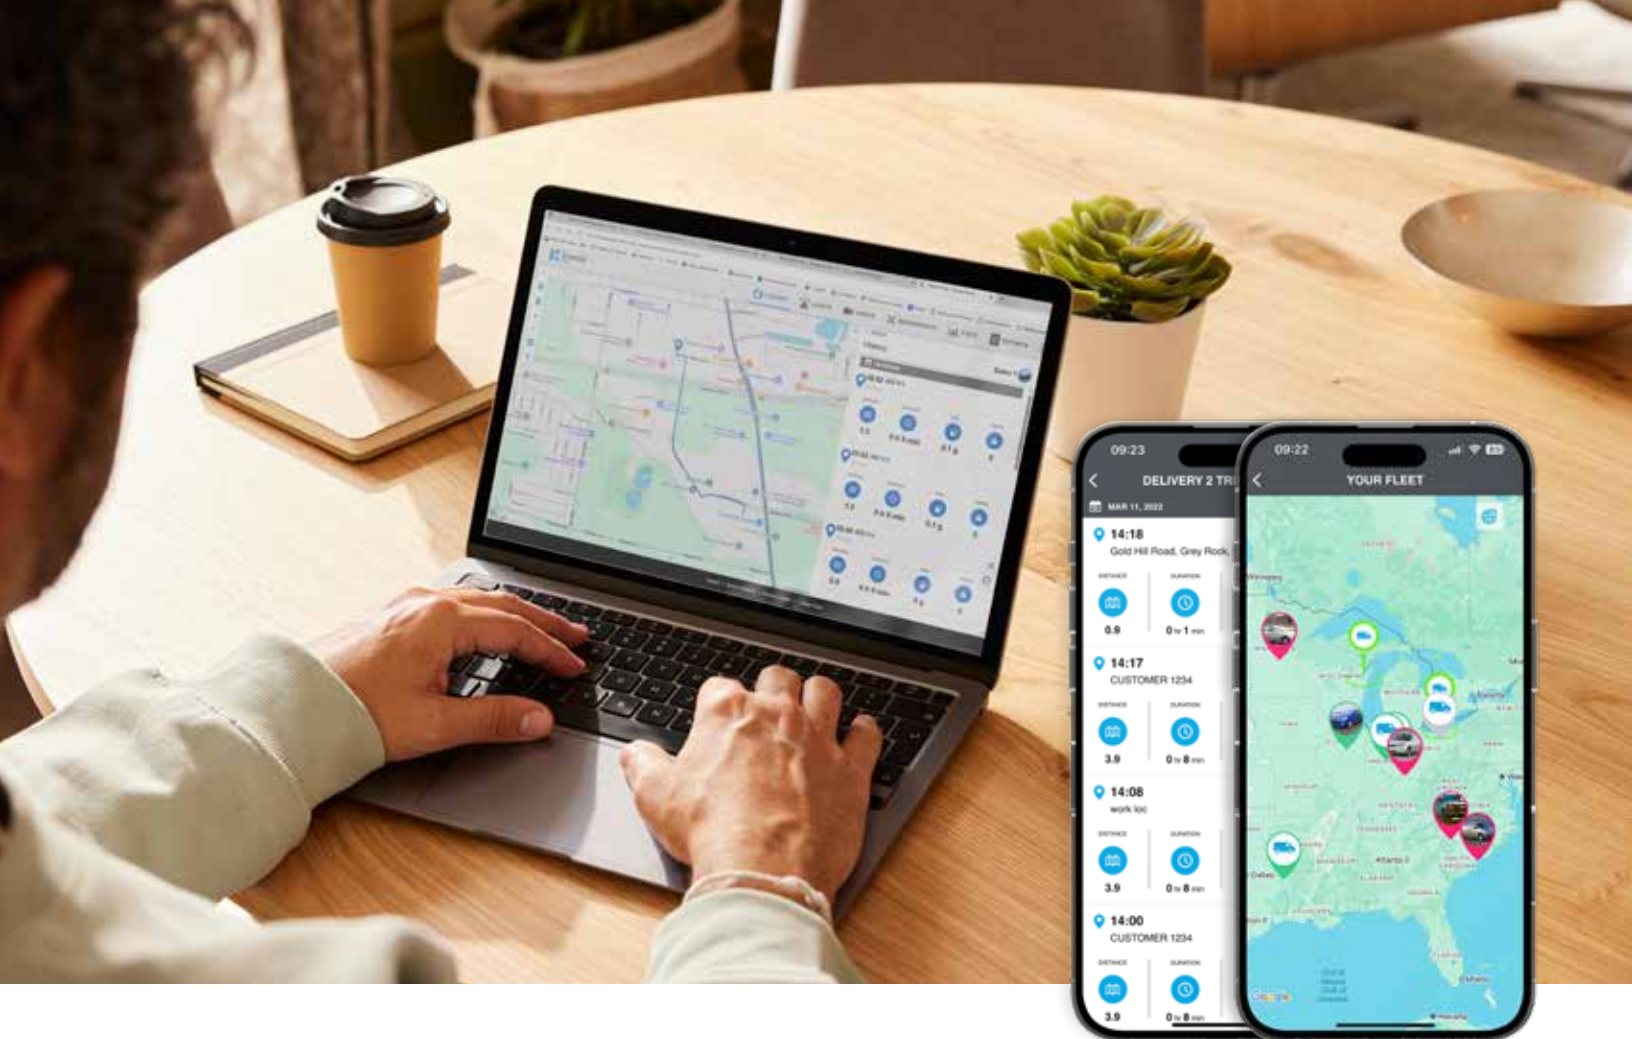

Easy footage access: You can remotely download video from our Kinesis platform without removing the SD card or having the vehicle on site.

Vehicle tracker compatibility: Seamlessly combine the power of dash cam footage with your Selective-provided vehicle tracker data to protect drivers and provide complete visibility of vehicle locations.
